Description :

Prsentation de l'diteurIn 1977 R W Johnsons best-selling How Long Will South Africa Survive? provided a controversial analysis of the survival prospects of the apartheid regime. Now, after more than twenty years of ANC rule, he believes the situation has become so critical that the question must be posed again. He moves from an analysis of Jacob Zumas rule to the increasingly dire state of the South African economy, concluding that the country is heading towards a likely International Monetary Fund bail-out, which will in turn lead to a regime change of some kind. In this updated edition, Johnson takes in recent events such as

Nenegate and the growth of the patronage state, the student protests at tertiary institutions and the fierce factionalism within the ANC. He analyses the teetering economy, the parlous state of government institutions such as SAA and SABC, and the role that ethnicity plays within the ANC and more broadly. Johnson's analysis is strikingly original. He has for several decades been a senior commentator on South African affairs, known for his complete lack of deference towards conventional wisdom. *Revue de presse* 'Well-written and well argued, his book is at its best describing the eye-watering corruption, nepotism and gang-violence that seem to link powerful officials in Zuma's home province of KwaZulu-Natal to the wider ANC. That South Africa's black leaders appear to have fulfilled the worst predictions of their white supremacist predecessors makes uncomfortable reading. What surprises Johnson is how quickly they managed to do it.' --*The Times* 'An immensely readable and disturbing book. Let us pray that his prophecies are this time mistaken. Ten years ago, Johnson would have been crucified for saying such things, but *How Long?* was greeted by an ominous silence in South Africa, making its way on to local bestseller lists without any review attention, not even attacks from Johnson's enemies. It seems even they are reconciled to the fact that Johnson is right again: South Africa is in crisis.' --Rian Malan, *The Spectator* 'Provocative polemic produces a devastating charge sheet against the ANC.' --*The Sunday Times* Presentation de l'auteur In 1977 R.
