## Description :

Prsentation de l'diteurWith unrivalled guidance straight from the IB, over 700 pages of practice and the most comprehensive and correct syllabus coverage, this course book will set your learners up to excel. The only resource developed directly with the IB, it fully captures the IB ethos, connecting mathematical applications with relevant, real examples.Revue de presseThe book looks amazing! I can't wait to get the inspection copy.

It looks very user friendly and complete. It is so ironic to see the GDC section with steps outlined as I was working on my own handout for the students. This is wonderful! (Melani Decelles, IB Mathematics Teacher, Kelvin High School, USA)The committee thinks the books are well written, easy to follow, and they like the

TI-NSpire technology throughout. (Education Ministry, Canada)The Oxford IB course books are the best ever resource for both teachers and students. They are practical, insightful and fully in line with the IB Course outcomes. (Pat Hanson, IB Coordinator, Academy of the Holy Cross, USA)We have adopted most of the Oxford course books for our school. We find them well written, well linked to TOK issues and age appropriate. (Sheta Saha, IB Coordinator, Chatsworth International School, Singapore)We like the structure with presumed knowledge, pre-test and exam style questions for each chapter. The including of Internal

Assessment requirements is very positive, so the students have full access to them through the process.  
(Annemarie Matsson, IB Mathematics Teacher, Katedralskolan Skara, Sweden)Prsentation de l'diteurWith unrivalled guidance straight from the IB, over 700 pages of practice and the most comprehensive and correct syllabus coverage, this course book will set your learners up to excel. The only resource developed directly with the IB, it fully captures the IB ethos, connecting mathematical applications with relevant, real examples.
