**Description :** Description du produitIt began with the Mayan calendar--a startling astrological artifact that reaches its end point in the year 2012. As major spiritual traditions, independent researchers, and archaeological findings all point toward this date as a critical moment in human history, readers everywhere are starting to ask the same question: What will happen in 2012? For the first time, the leading authorities on the 2012 phenomenon are all given voice in a single book, now available in paperback: The Mystery of 2012. An invaluable resource for readers who want to learn more about this time of change, this fascinating book features essays from dozens of prominent thinkers, including: \* Gregg Braden's examination of the scientific evidence for a shift in the earth's magnetic field--and how it will affect all life \* Barbara Marx Hubbard's and Peter Russell's explorations of the "accelerating pace of evolution"--why we may literally be transforming into a new species \* John Major Jenkins' journey to the source for answers: the original Mayan

calendar \* Ecologist Joanna Macy's vision of "the Great Turning," and how we can take part in this shift to a life-sustaining culture \* Daniel Pinchbeck on the meaning behind the rise in psychic phenomena as we approach 2012. Are we coming to the end of a cosmic cycle? Will there be an age of awakening, a new step in human evolution, or even an end to the world we know? For the growing audience of the "2012-curious," here is a thought-provoking and comprehensive exploration into the possibilities of this pivotal time.
