## Description :

Prsentation de l'diteurIf your child has been diagnosed with PPD NOS or an Autistic Spectrum Disorder, then this book is for you!Today only, get this incredibly useful guide for only \$2.99. Regularly priced at \$4.99. Read on your PC, Mac, smart phone, tablet or Kindle device.Its important to realize that just because your child has been diagnosed with Pervasive Development Disorder-NOS, or Autistic Spectrum Disorders, does not mean your child is imperfect, nor that he or she is anything less than another child the same age. Your child has just as much potential as any so-called normal child possibly even more. Did you know that most of the geniuses who made major scientific and mathematical discoveries in history would have been

classified as autistic? Your child might not fit into the cookie cutter mold that society tries to press upon him, but that's okay; he doesn't have to be a cookie cutter person. He can be his own individual self. Your job is not to change him so that he becomes the same as Jake, the little boy next door. It is simply to build bridges of communication with him, show him how to come out of his own personal world and interact with the universe around him, and help him to navigate this enormous confusing space that is our civilized world.

This book is written to help you do that exactly that. We'll look at Pervasive Development Disorder-NOS, what it is, and what it is not, so that you'll know what you're up against. We'll look at the common symptoms you might have noticed in your child, and then we'll look at what you can do, and how you can enable your child to live to his or her full potential, with a fulfilling inner life and an ability to communicate with those outside.
